

## CSCI 188 Project Proposal

### **[Title Of Project]**

[the date here]

[put your name here]

### ***Project Abstract***

[Provide about brief description of your application.]

### ***Strategy***

[Give a description of your overall design. What J2ME (or platform specific) features will you be using. Will you be developing your application for a specific phone or to run in the WTK emulator? ]

### ***Unknowns & Problems***

[Describe the parts of your design that you are not familiar with yet, or that you have not figured yet out. What problems do you anticipate.]

### ***Implementation Plan***

[Describe how you will complete your application, what steps will you need to follow. Include a simple milestone chart showing what you need to have done. Include how you will eliminate any unknowns and test your software components. Is there any critical path that you need to be conscious of? What classes will you need to implement? Take a stab at a preliminary class diagram for you application. Sketch the major parts of the User Interface.]
